

Professional Engineer's Certification

In accordance with §257.91(f) of the Rule, I hereby certify, based on a review of the information contained in the "Cheswick CCR Groundwater Monitoring Network Design Report" (APTIM, October 2017) and other information made available to me, and my knowledge and understanding of accepted hydrogeological principles, that the groundwater monitoring systems associated with the Cheswick CCR Units are adequate and appropriate. This certification further acknowledges the utilization of the required minimum number of monitoring wells as appropriate for the Cheswick Ash Disposal Site and the Bottom Ash Ponds, and also the adoption of a multiunit monitoring system (per §257.91[d]) for the Bottom Ash Ponds. The construction and orientation of the respective groundwater monitoring systems is sufficient to satisfy the performance standards outlined in §257.91(a)(1-2) of the Rule.
